Accounting and Finance for Non-Specialists

This edition of 'Accounting and Finance for Non-Specialists' provides comprehensive coverage of the basic concepts and practical applications of financial accounting, management accounting and financial management.

Accounting and Finance for Non-specialists

Now in its fifth edition, this successful text introduces the basic principles and underlying concepts of accounting and finance. It adopts a practical, non-technical approach, making it the ideal text for students from non-accounting disciplines. The text is written from a 'user' perspective, demonstrating ways in which accounting statements and financial information can be used to improve the quality of decision making.

Accounting and Finance for Non-specialists

Adopting an innovative, open-learning approach to introduce the main principles of financial management in an accessible, non-technical way, this fully updated fifth edition provides a unique focus on the practical application of financial management and its role in decision making. New to this edition: Expanded coverage of key topics such as financing the business Increased coverage of corporate governance issues Even more real-world examples to help illustrate the practical application and importance of the topics discussed Financial statements throughout based on the latest International Accounting Standards Full-colour design, packed with pedagogical features, providing an original learning experience Key features: Written in a unique, 'open learning' style Clear explanations and minimal technical jargon to aid understanding -no previous knowledge of financial management is assumed Based on a solid foundation of theory, but focusing throughout on its value for decision making Covering all the main areas of financial management in sufficient detail to provide a good grasp of the subject Numerous examples, activities and exercises throughout, allowing the reader to test his/her knowledge at frequent intervals Fully supported by a comprehensive range of student and lecturer learning resources, Financial Management for Decision Makers is ideal for undergraduates from a non-finance/accounting discipline taking an introductory module in financial management, and postgraduate/postexperience students on courses such as the ACCA Diploma in Financial Management, Diploma in Management Studies and MBA programmes. The text is also suitable for finance and accounting students as a foundation for further study. Peter Atrillis is a freelance academic and author working with leading institutions in the UK, Europe and SE Asia. He has previously held posts as Head of Business and Management and Head of Accounting and Law at University of Plymouth Business School.

Accounting and Finance

Accounting an introduction 3rd edition covers the principles of financial accounting, management accounting and financial management emphasising the practical application and interpretation of information for real world decision making without theoretical or technical data.

Financial Management for Decision Makers

'International Financial Reporting' delivers a focused, user-friendly introduction to international financial reporting and how to implement the IASB standards for undergraduate students. With more than 140 countries in the world now using international financial reporting standards (IFRSr Standards), knowledge of

the standards issued by the International Accounting Standards Board (IASBr) is vital to students' success in financial accounting. Melville's International Financial Reporting employs a practical, applied approach in exploring and explaining the key international standards. With a focus on how to implement the standards, this text delivers a focused, user-friendly introduction to international financial reporting. Renowned for clear and concise language, this seventh edition brings the book completely up-to-date with international standards issued as of 1 January 2019.

Accounting

Writing in a non-technical way, Peter Atrill presents a range of topics related to financial management whilst managing to avoid too much detail and unnecessary mathematical analysis. The book is aimed at an undergraduate level audience.

International Financial Reporting

From the well-established author team of Eddie McLaney and Peter Atrill this text aims to offer non-specialist students a balanced introduction to financial and management accounting.

Financial Management for Non-specialists

With a comprehensive and accessible introduction to the subject, Financial Accounting for Decision Makers focuses on the ways in which financial statements and information can be used to improve the quality of decision making. The practical emphasis throughout the book ensures the material is always relevant, whilst the authors' style of introducing topics gradually and explaining technical terminology in a clear, friendly style caters for all students, whether on specialist accounting or non-specialist business degrees.

Accounting

This introductory text covers the basic principles and underlying concepts with a strong practical emphasis and plenty of examples taken from the real world as well as numerical examples with step-by-step explanations.

Issues in Accounting and Finance

This text is an introductory course in management accounting for those seeking an understanding of basic principles and underlying concepts without detailed technical knowledge. It has a strong practical emphasis, with plenty of examples taken from the real world as well as numerical examples with step-by-step explanations.

Financial Accounting for Non-Specialists with Accounting Dictionary

'Accounting for Business' is ideal for undergraduate students on business and accounting courses who need to understand the nuts and bolts of financial accounting. This popular textbook has always enjoyed a deserved reputation for accessibility and thoroughness. Now in its third edition, its contents have been fully updated and restructured to make them even easier to use. Readers will benefit from the coverage of current accounting practices and legislation, in addition to the range of worked examples and self-test activities throughout the book. 'Accounting for Business' clearly explains accounting information's role in making sound business decisions and focuses upon the aspects of accounting practice which are most relevant to the non-specialist manager. It is ideal for first year undergraduates of business studies, higher students and those pursuing professional accountancy qualifications. This third edition has been restructured, to further enhance its 'student centred' approach. The content has now been broken down into 25 roughly equivalent 'bite-sized'

individual study topics. Each of these requires 6 hours of study time, enabling this book to support a full scale semester course with two topics a week, or a full year course at one topic a week. Includes a wide selection of topical case studies, with a broad spread of international examples.

Financial Accounting for Decision Makers

"This book provides an introduction to accounting and finance. It is aimed at Students who are not majoring in accounting or finance but who are, nevertheless, studying introductory level accounting and finance as part of their course. The course may be in business, economics, hospitality management, tourism, engineering or some other area. For these students, the book provides an overview of the role and usefulness of accounting and finance within a business or some other organisation. Students, who are majoring in either accounting or finance. These students should find the book a helpful introduction to the main principles, which can serve as a foundation for further study"--

Financial Management for Decision Makers

This is the new edition of the bestselling guide to understanding and using business accounts and accounting principles, written in a way that even the financially nervous novice can easily absorb. Accounting is generally viewed as a highly technical and complex subject. However, accounts are actually based on simple principles. It's not company accounts that are complex, it's all too often the way that they are explained. In this simple and easy read book, the author guides you through all the major accounting concepts. Discover how to master company accounts, understand balance sheets, profit and loss accounts and cash flow systems. Learn to analyse and monitor your company's financial performance. Accounts Demystified is the definitive, user-friendly guide to the fundamental principles of accounting that no manager will want to be without. In this 5th edition of the classic Accounts Demystified, Anthony Rice makes accounting astonishingly simple and pain-free.

Management Accounting for Decision Makers

How many senior executives and managers are able to reach the top with little or no financial training? They may have been appointed to the executive board as a result of their expertise in marketing, HR, sales or IT, yet every board member has a responsibility to make informed decisions on proposed financial actions - decisions which inevitably affect the value of their business. Offering straightforward and practical advice, Creating Financial Value will equip those who are not financial specialists with the necessary knowledge not only to contribute fully to important discussions on policy and strategy, but also to develop sound business proposals, or to competently cross-examine the proposals of others. Through examples from a range of business disciplines, the book explains in simple, digestible terms how a business creates financial value, and how a non-financial manager can confidently take an active role in the process. Once read, the book will provide an essential resource that can be referenced time and again. Malcolm Allitt punctures the myths surrounding 'shareholder value' and looks behind the finance jargon to define the boundaries between what a non-specialist should know and when it is good practice to seek the advice of financial specialists. This book is key reading for anyone from a non-financial background who wants to execute their increasingly broad responsibilities competently and confidently, without the need to become experts themselves.

Management Accounting for Decision Makers

This is an introductory level text for students undertaking accounting or business studies that offers a foundation to financial accounting. An interactive approach has been adopted to integrate the theory with practical situations.

Accounting for Business

'Financial Accounting for Decision Makers' presents the key concepts of accounting without going into too much unnecessary technical detail. The book is aimed as 'users' of accounting information, not 'preparers' of accounts.

Financial Accounting

This is a key textbook for specialist students of accounting and finance, either undergraduate or professional, taking a first course in auditing. In this fourth edition the authors continue to provide a refreshing, imaginative and thorough introduction to the audit process, with a rational and coherent foundation for the appreciation of auditing practice. This Revised ISA edition is entirely up to date with changes post-Enron, with new international auditing standards and IFRS replacing UK accounting standards for the first time. With the aid of numerous examples, case studies and questions, *The Audit Process: Principles, Practice and Cases* provides a realistic and thought-provoking insight into the individual components of the auditing process in the context of the entire audit. A major strength of the book is its questioning approach, designed to encourage the student to interact with the material.

Accounting and Finance for Non-Specialists

Were you looking for the book with access to MyAccountingLab? This product is the book alone, and does NOT come with access to MyAccountingLab. Buy *Accounting and Finance for Non-Specialists, Tenth Edition* by Peter Atrill and Eddie McLaney with MyAccountingLab access card 5e (ISBN 9781292135601) if you need access to MyLab as well, and save money on this resource. You will also need a course ID from your instructor to access MyAccountingLab. The 10th edition of this market-leading text offers an accessible, effective introduction to key accounting and finance topics. If you are new to accounting, or are studying a degree in accounting, this book will help you get to grips with the important principles of accounting and how to apply your learning to real-world business scenarios in a user-friendly manner.

Accounting and Finance

Aimed at non-accounting management students, this textbook offers a thorough introduction to management accounting, approaching the subject from a managerial perspective, without sacrificing accuracy or detail.

Accounts Demystified

The new seventh edition of 'Introduction to Financial Accounting' has been fully revised and updated to reflect the very latest developments in this dynamic field and offers contemporary and comprehensive coverage of Financial Accounting today.

Creating Financial Value

Accounting: an introduction by Atrill provides a clear and approachable introduction to accounting and finance for those seeking to understand the main concepts and their practical application to good decision-making.

An Introduction to Financial Accounting

ACCT3 Financial is the Asia-Pacific edition of the proven 4LTR press approach to financial accounting, designed to enhance students' learning experiences. The text is for teaching students learning the preparers/debits and credits approach and is presented in an easy-to-read and accessible style. Concise and complete new data and case studies from the Australian branch of CSL have been included as well as fully

updated content. This new edition also includes a strong suite of student and instructor resources, including CourseMate Express, to enhance student learning and revision.

Financial Accounting for Decision Makers

It has never been more important for businesses to operate within a framework of strategic planning and decision making. This popular introductory text teaches you how to make the best choices in managerial and other business roles. This text is aimed at undergraduate students who wish to grasp key elements of management accounting and those seeking a foundation for further study. The full text downloaded to your computer With eBooks you can: search for key concepts, words and phrases make highlights and notes as you study share your notes with friends eBooks are downloaded to your computer and accessible either offline through the Bookshelf (available as a free download), available online and also via the iPad and Android apps. Upon purchase, you'll gain instant access to this eBook. Time limit The eBooks products do not have an expiry date. You will continue to access your digital ebook products whilst you have your Bookshelf installed.

Accounting for Non-specialists

Written in a clear and intelligent way, this guide gives a concise grounding in the key areas of financial accounting, management accounting, taxation, financial instruments and corporate finance.

The Audit Process

Financial Accounting for Non-Specialists focuses on using financial information, rather than the preparation of accounts and as such, avoids the use of double-entry book-keeping throughout the text. The main principles appear in an appendix.

Accounting and Finance for Non-specialists

Business finance from a user's perspective is the focus of this book, rather than being purely an academic study. It is an introduction to making decisions about investments the firm should make and how best to finance those decisions.

Management Accounting for Business Decisions

Trotman's Fundamentals of Accounting and Financial Management (previously Financial Accounting) incorporates comprehensive coverage of financial accounting in Australia and includes issues in sustainability, as well as current and emerging issues, while building upon the approachable, user-friendly, Australian-focused style of previous editions. This eighth edition continues to provide students with a detailed understanding of the accounting framework using a balanced and engaging approach that provides non-accounting majors with enough detail to understand and analyse company financial statements, and provides accounting majors with a sound basis for future studies in accounting.
